PROFESSIONAL SUMMARY

Product Designer (UI) with 5+ years of experience, having progressed from visual design into UI design and now into product design as the scope of the work expanded. Designs digital products for clients including Disney, TDK, Parle and TVS, across e-commerce, industrial technology, health, automotive and SAP enterprise ecosystems.

Specialist in design systems and UI design: built a complete design system from the ground up for TDK, and currently extends an established enterprise design system on the live Disney Store e-commerce product. Works across the full design lifecycle: requirements, user flows, information architecture, wireframing, interaction design, responsive UI, prototyping, developer handoff and design QA.

Effective both as the sole designer owning every decision on a product and inside cross-functional teams with UX designers, content strategists, product managers and engineers. Partners closely with UX on user journeys, information architecture and wireframing. Uses AI tools daily to accelerate exploration and iteration.

SKILLS

Design: UI Design, Product Design, Visual Design, Interaction Design, Design Systems, Component Libraries, Responsive Web Design, Mobile App Design (iOS, Android), Wireframing, Interactive Prototyping, User Flows, User Journeys, Information Architecture, Usability, Accessibility, Design QA, Enterprise Application Design

Tools: Figma, Figma Variables, Design Tokens, Auto Layout, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe After Effects, Adobe Creative Cloud, SAP Mobile Development Kit (MDK), AI design tools

Collaboration: Cross-functional collaboration, Stakeholder communication, Developer handoff, UX collaboration, Requirement gathering, Work and priority management, Mentoring, Agile delivery

WORK EXPERIENCE

Product Designer (UI)

Dentsu Global Services (formerly Extentia Information Technology), Pune, India | 01/2022 - Present

- Design digital products for global and Indian brands across consumer, e-commerce, B2B and enterprise domains, on both web and mobile.
- Own the design lifecycle on assigned products: requirements, user flows, wireframes, interaction design, high-fidelity UI, prototyping, developer handoff and design QA.
- **Build and maintain large-scale design systems** and component libraries: component architecture, variants and states, design tokens, Figma Variables and Auto Layout. Audit existing patterns for inconsistency and design scalable replacements.
- Work from UX and research inputs provided by UX partners, developing them alongside business requirements into user flows, wireframes and interaction models.
- Deliver projects and features to timeline, with multiple products shipped to live production environments.
- Progressed from Visual Designer (UI-focused) to Product Designer (UI). Same team throughout: Extentia was acquired by Merkle and now operates as Dentsu Global Services.

Design Intern and Consultant

Ogee Studio (contract engagement, deployed to Extentia Information Technology), Pune, India | 04/2021 - 12/2021

- Contributed to visual and UI design across client accounts, moving onto the Extentia payroll in January 2022.

KEY PROJECTS

Disney Store UK, Loyalty Program

E-commerce, Consumer (B2C) | EMEA | Ongoing | Team of 2 with a UX Director

- Sole UI designer on the loyalty program for the live Disney Store e-commerce website, serving customers across the EMEA region.
- Design member journeys, loyalty touchpoints, UI states and fully responsive desktop and mobile interfaces across **25+ unique pages and 50+ screens** on a continuously evolving program.
- Work extensively within the established Disney design system, a library of **100+ components and variants**, restructuring and extending components, variants and states to support new loyalty patterns.
- Collaborate with product and engineering through implementation, review and iteration on a live product.

TDK, Smart Sensing Solutions Website

B2B Technology | 8 months | Team of 7 (2 Visual Designers, 2 UX Designers, 1 UX Content Writer, 1 Project Manager)

- End-to-end redesign of the smart sensing solutions website for TDK, a global electronic components manufacturer. A **B2B experience** aimed at design engineers and product teams evaluating sensor solutions for automotive, industrial and consumer applications.
- Built the **entire design system from scratch**, covering **75+ components** plus color, typography, spacing and alignment scales, theming, brand interpretation, states and documentation, forming the foundation for the full site.
- Designed **20+ unique pages and 50+ screens** across breakpoints, and contributed to the UX layer through wireframing, navigation, page architecture and content hierarchy, so specialist buyers could evaluate a highly technical product range.
- Delivered a mobile-inclusive responsive experience across all breakpoints, working closely with developers to keep the design technically feasible.

Women's Health and Pregnancy App

Consumer Mobile (B2C) | Sole UI Designer | 35 mobile screens

- Solely responsible for the UI design of a mobile app supporting women through pregnancy and pregnancy planning, covering **35 screens** and owning every visual and interaction decision end to end.
- Developed a visually rich, warm and reassuring design direction appropriate to a sensitive health context, while keeping journeys simple and readable.
- Delivered the complete UI system independently, covering screens, states, components and prototypes, with the work praised and accepted by the client.

Parle, Wholesaler and Employee Portals (SAP)

B2B Enterprise Application | 1.5 years | Ongoing | 150+ screens to date

- Designed two connected SAP-based products for Parle, an internal portal for employees and a distribution platform for wholesalers, spanning both web and mobile, running to **150+ screens** across an 18-month engagement that is still active.
- Designed flows for tracking stock quantities and managing key business information, developing dense functional requirements into clear, efficient screens for non-technical daily users.
- Designed within the **SAP Mobile Development Kit (MDK)** ecosystem, working inside enterprise component and platform constraints.
- The project won the **SAP BTP Innovation Award**, with individual recognition through the **Infinity Award** at Dentsu Global Services for the design contribution.

TVS iQube, Connected EV Experience

Automotive, Consumer Mobile (B2C) | 1 year

- Contributed to the redesign of the TVS iQube companion mobile app across **60+ screens**, enabling riders to access vehicle information and connected features from their phone.
- Designed interfaces and interaction patterns for vehicle data, status and connected-feature journeys within the vehicle-to-app ecosystem.
- Worked with stakeholders and developers to develop product requirements into responsive mobile experiences.

AWARDS AND RECOGNITION

- **SAP BTP Innovation Award**, awarded to the Parle SAP portals project.
- **Infinity Award**, Dentsu Global Services. Individual recognition for design contribution to the Parle SAP project.
- **University Flag Design**, selected to design the official flag of Vishwakarma University.

EDUCATION

Bachelor of Design (B.Des.), Graphic Design Vishwakarma University, Pune, India | 2021

Design Foundation, Design and Applied Arts Bharati Vidyapeeth College of Fine Arts, Pune, India | 2015 - 2016
